items I could sell at a profit on an auction site, or even my own garage sales. But this woman has really charmed me with her wealth of knowledge about jewelry and metals. Just some of the tips I learned concerned the astute use of a magnet (not what you think), the LOA connection (I sooo believe in this) and the "other than jewelry" idea. I am not going to give anything away but you can be assured that I will be looking at for a few extra items when I go to my next garage sale tomorrow :) This author knows what she is talking about and I loved her personal stories among the gems of information that are passed along. Shame I am not in US or I would be hunting her out to see if she wants to come to yard sales with me - highly recommended. I never thought finding gold and silver was so easy. I've witnessed a major gold mining operation with my own eyes. My goodness. I couldn't believe all the equipment being used. There were dump trucks the size of small planets, enormous shakers, humongous drills and massive other pieces of machinery that I have no idea of their names or purpose. I'll never forget the earth shaking explosions, from the blasting powder, with dirt and debris being hurled into the air. I've tried recreational gold panning myself. It was fun and rewarding. Rewarding in the fact that I was outdoors, not that I was finding very much gold. Truth is, all the gold I ever found wouldn't buy enough gasoline to fill my car even once. It was a lot of backbreaking tedious labor, but it was fun. The author of this book has taught me other ways of finding more silver, gold and precious stones than I ever imagined. I took this book on a very recent Caribbean cruise for something to read at night. While I was reading it, I was enroute to the Virgin Islands and I begin to think. Jewelry sales outside the US is very big business. I've been to many port cities and every one is jammed with jewelry stores. Literally hundreds of them. Those of you who've had this experience can relate to what I'm saying. I bought my wife's engagement ring on one of these trips years ago. After reading parts of this book, I decided to be a looker this time and not a buyer. As I wondered around these cities, I kept looking and thinking about all the millions and millions of dollars in treasure that lay within the walls of these shops. I was thinking about the behemoth mining operation I has seen years eariler. The ship that I was on had over 4,300 passengers and there were 6 ships in one port at the same time. I was on a 7 day cruise and these ships make these trips all year long. Over and over and over again. I thought, "all of this treasure has to wind up somewhere", and it does. Safe deposit boxes, jewelry boxes, fingers, wrists, etc. The author of this book tells where another percentage of this treasure winds up, and then tells you how to look for it. I've only had 2 weekends to try her methods, and in this short time it has worked so well, that I've bought Black Hills Gold earrings, a .925 silver necklace (40.9 grams), a .925 silver bracelet, several silver charms and many other items at some ridiculously low prices. In all fairness though, I must tell that I did pay \$100.00 for a 1/2 karat (solitaire) diamond marquise cut ring, set in 14k white gold. I was able to use 2 techniques detailed by the author to determine that the diamond was genuine. I could go on and on raving about my finds, but you don't want to hear of my success. Read the book and have your own stories to tell. I really can't wait for the weekends now because I'm using her methods to save for another cruise. 0 of 0 people found the following review helpful. Excellent reference book By Chelley When I purchased this book, I had already been involved in precious metals. So, when I received it, I was not expecting anything new. I was pleasantly suprised to learn how to make intelligent searches on the internet, and several other great tips. Highly recommend this book, especially the abundant feeling this book projects.

A Bargain Hunter's Guide to saving and making money with gold and silver objects, like jewelry. Which of these do you want? - to have extra money to pay your bills? - to find spectacular gifts for your loved ones at ridiculously low prices? - to have lots of beautiful head turning jewelry to wear? - to invest in precious metals for less than the current spot price? - to have extra money to take that vacation you've been dreaming of? - to protect yourself or your family's finances in the event of a serious crisis? - to know more about buying and selling precious metals? So you aren't ripped off. - to know how you are missing deals on precious metals in plain sight? - to make your own decisions and be your own boss? If you have a want or need associated with any of the above questions, then this book might be your answer. Imagine your excitement, when you notice a beautiful thick gold colored necklace lying on a table at an estate sale. You quickly pick it up. It's heavy and looks like gold. However, the only mark on it doesn't indicate gold, so you put it down. Luckily you read this book and remember the lesson on marks, and quickly pick it up again. Jackpot! You bought an 18 K gold necklace for \$2; it's worth \$246 for the gold content value. That's a \$244 profit/savings in less than 5 minutes. Would this put a big smile on your face? This is one of my true stories; check out picture 53 to see it. Make money, save money and invest in precious metals: Is it possible to make money finding gold and silver in your spare time? The answer is yes. If I sold all the items I purchased, I'd average \$24-\$73 per hour. I've been doing this and now it's your turn. I want you to capitalize on the opportunities all around you; trust me they're out there. In addition to making money, I wanted to invest in precious metals without affecting my family's budget. I couldn't imagine taking \$1,600 from my monthly income to buy one gold coin, but I could take \$2 to buy gold jewelry. Does this sound familiar; do you have the same thoughts? Take this educational journey with me and reap your rewards. Capitalizing on these amazing deals not only allows me to make money and invest in precious metals, but I'm able to save money buying gifts for my family, friends and myself. If I spend \$2 on a gold necklace and pendant set that retails for \$100, I saved myself \$98. Now that's the smart way to keep up with the Joneses. Or if I give it away as a

gift, no one will know I only spent \$2; they'll think I spent \$100. Read this book and you could save substantial amounts of money too. Filled with killer (not filler) content, including:- ideas on where to search (offline and online),- stories to provide proof, entertainment, and illustrate the lesson being taught,- tips on finding the gold and silver that others miss,- techniques on how to find the precious metals,- hallmarks and hidden marks to look for,- how to get the best price for your items,- how to sell your gold and silver,- warnings to help protect you and your money,- how to test your precious metals,- 88 pictures,- and lots more information (print equivalent is over 205 pages). This book will pay for itself many times over:- IF YOU SAVE \$100 buying a gift (a gold ring) for a friend, or- IF YOU MAKE a profit of \$75 selling a precious metal item, or- IF YOU SAVE \$40 investing in a few ounces of sterling silver, by using one piece of information, then the book paid for itself many times over. You didn't lose a dime and all the information is free to use repeatedly, forever. How can you go wrong with that deal? With the current high spot prices of precious metals, just one necklace, one pendant, or two forks can be worth these types of savings and profits, easily. No, I'm not promising thousands of dollars in 10 minutes, but it's possible. It has happened to me. I paid \$5 for a gold whale pendant that retails for around \$2,000. Read this story in Chapter 4.
