**Ralph H Simpson : CIPHER History Museum Catalog** before purchasing it in order to gauge whether or not it would be worth my time, and all praised CIPHER History Museum Catalog:

This catalog contains pictures and short descriptions of a wide variety of cipher machines, which are on display at the CIPHER History Museum. Each chapter highlights a different cipher technology by providing an overview of that technology and then describing the machines chronologically, just as they appear in the museum. Additional information about the history and technology of these machines, along with more detailed pictures, is available at [CipherMachines.com](http://CipherMachines.com).
